

Workshop March 1, 2022: Project BSFL in feed

Feed Design Lab, Stayerhofweg 25F, 5861 EJ Wanssum

Is your company interested to join in a project to increase the knowledge of the chain in growing, processing and use of Black Soldier Fly larvae in feed for dogs? Or in pigs or poultry? Then follow our Black Soldier Fly Larvae workshop to learn more about them!

Our intern will give you some new insights about BSFL and will share his results from literature research.

Program Workshop

12.30: Walk in with sandwiches

13.00: Opening by Trudy van Megen, director Feed Design Lab, and introduction participants

13.30: Introduction project by Ageeth van der Lee

13.45: Results literature search by Sjors Geurts

14.00: Discussion about 3 parts in the project:

- 1) Raw materials used as substrate for BSFL to grow
- 2) Processing: drying harvested BSFL and using dry or fresh BSFL in feed
- 3) Using feed with BSFL in experiment with dogs/broiler/piglets

14.30: Coffee Break

14.45: Presentation of discussion groups

15.30: Wrap up, ideas and project design

16.00: Closing session

After the workshop the pilot plant is open for tours.
