

INVITATION

1/6/22

YFEEDPRO

MEETING YOUNG PROFESSIONALS

HOW CAN THE COMPOUND FEED INDUSTRY MEET THE TARGET OF THE GLASGOW CLIMATE PACT?

In November 2021, the Conference of Parties met, and the Glasgow Climate Pact (GCP) was born from the Paris Agreement, recognizing the call of various governments, municipalities and organizations that had declared a climate emergency. The Pact is set to limit the global warming to 1,5 °C compared to pre-industrial levels.

What does this Glasgow Climate Pact mean for the compound feed sector? Will this affect our license to produce and how? What will the compound feed company of the future look like in terms of energy consumption, production processes and the range of raw materials used? Can we as a sector make the production process energy neutral within the next 30 years? What does the customer of the future look like? And which people will be at the helm of the feed industry? What is expected from us, the future young feed professionals?

TIME FOR CHANGE!

During our congress we have two presenters that will take you through their vision about how the compound feed sector has to meet the Glasgow Climate Pact. First, Sander Geelen of Geelen Counterflow will talk about how the compound feed industry can evolve towards a CO₂ neutral production. Second, Michiel Peters of Royal De Heus will present how to guarantee continuation of our license to produce by meeting the GCP, both at global and at regional scale.

DO YOU WANT TO JOIN THE FUTURE?

As far as we are concerned, these are enough questions that call for more discussions with you and experts from the sector! Are these questions also on your mind? Then join us and discuss them with us during our congress on 1 June 2022.

The meeting is free of charge.

WHO ARE WE

The Young Feed Professional Congress is a joint initiative of the Dutch Feed Industry Association (Nevedi), the Belgian Feed Association (BFA), Feed Design Lab (FDL), the board of the Young Feed Professionals (yFeedpro's) and students of the Foundation for the Advancement of Studies in Animal Nutrition (BSD). The yFeedpro's are a network of young professionals in the feed and pet food industry who together take up the challenge to share knowledge and network for a feed sector with a perspective for the future.

TIMETABLE

12.00 h	Network lunch
13.00 h	Opening by Annemarije van Hoek (President of the Young Feed Pro's) and subject intro by the host Merel Postma.
13.15 h	Presentation: Toward CO ₂ neutral feed production by Sander Geelen, Managing Director of Geelen Counterflow
13.45 h	Presentation: How sustainability can improve the feed industry's license to produce by Michiel Peters, Manager Corporate Affairs of De Heus Animal Nutrition.
14.15 h	Discussion
15.00 h	Network drink/ending congress/visit Victam&VIV

WHEN?

Wednesday 1 June 2022

WHERE?

During the Victam/VIV 2022, Utrecht, The Netherlands.

Sponsored by:

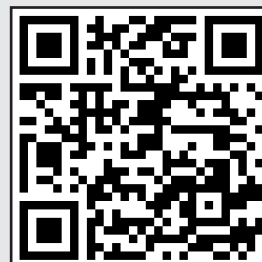

Congress participants also have **free access** to the Victam/VIV

Sign up!
