

## Program Workshop Towards 100% Circular Feed

### June 21, 2023 Feed Design Lab

- 12.30-13.00 Walk-in with sandwiches
- 13.00-13.20 Opening and introduction to the program by Trudy van Megen, director Feed Design Lab
- 13.20-13.50 Presentation: *“Trials in the feed plant and in piglets with pumpable co-products in pelleted feed”*, by Ageeth van der Lee
- 13.50-14.20 Presentation: *“Experiences with high fibre raw materials and liquid wheat starch in a pelleting experiment”* by Ageeth van der Lee, on behalf of Tom Bastiaans
- 14.20-14.50 Presentation: *“Screeningstool for potential new raw materials: practice using an unconventional example”*, by Martin de Groot, Bonda/Agrifirm. The aim of the screening tool is to show subjects for judging the potential of new raw materials for feed.
- 14.50-15.30 Needs and wishes for a practical tool to process co-products into to pelleted feed
- 15.30-15.45 Coffee break
- 15.45-16.30 Propositions for discussion:
  1. Pelleted feed with a higher moisture content fits perfectly into the current system of feeding pigs
  2. The application of wet co-products is possible with the right equipment in a dry feed plant
  3. Using pre-processed or fermented co-products will boost the use of circular raw materials in pelleted feed!
- 16.30-16.45 Evaluation, follow-up appointments and conclusion
- 16.45-17.30 Talk over with a drink
